- System Configuration

Work History

IT MANAGER, 02/2019 - 03/2021
Tek Devisal, Kumasi, Ghana

- Set up hardware and software in optimal configurations to meet network performance requirements.
- Broke down and evaluated user problems, using test scripts, personal expertise and probing questions.
- Explained technical information in clear terms to non-technical individuals to promote better understanding.
- Adjusted project plans to account for dynamic targets, staffing changes and operational specifications.

SOFTWARE DEVELOPER, 01/2018 - 01/2019
CopelT Labs, Kumasi, Ghana

- Collaborated with project managers to select ambitious, but realistic coding milestones on pre-release software project development.

- Authored code fixes and enhancements for inclusion in future code releases and patches.
- Carefully documented technical workflows and knowledge in private wiki for education of newly hired employees.

Projects

- **DaChurchMan**. A church management system to help churches manage their membership, attendance, finances, contributions, stock and many more. Complete with Multiple User Roles, System customization with security in mind.
  https://dachurchman.com/
- **Willfind8**. An E-commerce system for the finding of scarce items and connecting sellers to buyers.
  https://www.willfind8.com/
- **Noise Control Device.** A device built from scratch equipped with sound detectors, anti tempering capabilities, sms functionality that alerts noise pollution authorities via sms anytime noise exceeds a set threshold. This is to curb noise pollution in our cities.
  https://www.modernghana.com/news/958943/kma-knust-join-heads-to-stop-noise-pollution.html
- **Smart Fire Alert**. An embedded system that alerts fire service and owners of a facility in case of a fire. Features include super fast response time, multiple sensor inputs, super sensitive industry grade smoke sensor, super sensitive ambient temperature sensor, configurable sensor, emergency calls and sms, 120 decibel alarms
- **Automated Payment System** at Ejisu-Juaben Municipal District in the Ashanti Region of Ghana. This system is used in the public toilet facility in this District. What is does it to collect the fees needed in order to make use of the toilet facility. Coins are placed into the coin compartment, then if the amount is right (Ghc 0.50), the doors of the facility are opened to user. This has helped the District effectively accumulate funds from the facility
